AMRAHA ANWAR

ROLL: 307318

SLOT: FRIDAY MORNING (9AM TO 12PM)

HACKATHON 3 DAY-6

Deploy on Vercel and Push on Github

Github uploading procedure:

- I have placed all secrey keys in .env
- Then place that .env file in gitignore file so that it will not be pushed on github
- By doing so my secret data will remain secret

GITHUB LINK
https://github.com/Amraha-Anwar/Ecommerce-marketplace.git

Deployment Best Practices:

- **Chose Vercel to be the host of my marketplace**
- **Followed best practices before deploying it**
- **Run "npm run build" command on terminal so that the deployment procedure will be secured from errors**
- **Placed all of my secret keys and environment variables on vercel before deploying the project**
- **After deployment gave permission to "cors"**
- **Visitor can see sanity dashboard through it**
